

More about the WCCT

The World Center for Concrete Technology (WCCT) located on the campus of Alpena Community College in Alpena, Michigan is please to announce that in cooperation with the International Concrete Polishing and Staining Conference they will be offering two sessions in the fundamentals of concrete. At the completion of the second session, a test will be available for those interested in receiving a certificate of completion. The WCCT is a globally known facility that specializes in education, employee training, research and testing for the concrete industry for over 35 years. From its nationally known Associate in Science degree in Concrete Technology which is the only one in the United States to its series of online training courses, the WCCT should be your facility of choice for concrete related training, testing, or applied research. For additional information visit our booth at the conference, our web site at www.wcct.net or call 989-358-7238.

ICPSC partners with World Center for Concrete Technology to offer classes...

In keeping with our pledge to offer continued education in an unbiased and academic manor, the ICPSC is pleased to announce its collaboration with the [World Center for Concrete Technology](http://www.wcct.net) (WCCT). Its purpose is to provide leadership, advancement and mastery of concrete technology through education, training, research, testing, information management and communications. The WCCT is located on the campus of Alpena Community College in Alpena Michigan. [Alpena Community College](http://www.alpenacollege.edu) offers a two year degree in Concrete Technology along with online training.

The WCCT classes presented at this year's conference will include certificates of completion to those attending.

The combination of WCCT classes, AIA Credited seminars and unbiased presentations by Top Industry Experts makes the ICPSC the best educational format for our industry.
